

## Rugs

Belly cut only for this kind of mount.

It is imperative to keep the animal cool, either by gutting the animal (please do not gut if doing a dorsal cut), or skinning the animal.

Allow the skin to cool to the touch, then fold, flesh side together and place in a bag, preferably a breathable bag.

Keep out of direct sunlight and away from exhaust heat from any vehicle.

Do not salt, or let skin air burn.

Do not slit the throat.
